

When Precision Counts –
Count On MSK

COMPLEX. SUPERIOR. PRECISION.

Medical Device components built by skilled craftsman, used by world-class surgeons

The face of the Modern Medical Device industry is ever-changing, and evolving at an incredible pace. Advancements in robotic surgery techniques coupled with technological leaps in vision systems and space-aged materials have opened new realms of possibility, and made it even more important for Medical Device OEM's to constantly evolve in order to stay cutting edge. MSK Precision partners with World-class OEM's to make their designs a reality, and helps them retain a competitive edge by getting product quickly to market and then supporting production needs as their new advancements are adopted world-wide.

QUALITY

Quality is at the heart of everything we do. MSK has developed a stellar reputation in the industry by producing tangible results for some of the most demanding Med Device companies in the world. Satisfying our Customers is not enough – our minimum standard is to far exceed expectations.

- Certified to ISO 13485:2003 and ISO 9001:2008
- FDA registered as a contract manufacturing facility
- Validate special processes to ensure repeatability, minimize inspection time and reduce cost
- Investing in employees through various training programs designed to integrate quality and craftsmanship into everything we do
- Embrace Lean Manufacturing and Six Sigma principles throughout the organization
- 'Self Release' certified by some of the biggest names in the industry

CUSTOM-TAILORED MANUFACTURING SOLUTIONS

Think of us as your personal manufacturing facility. We provide the Engineering horse-power to support fully from design, through prototyping and into production. We customize our manufacturing to support your needs- through concept, 510(k), initial product launch and into full production. If you need a conservative number of sets for validation, we are there. If you are preparing for a large product launch, or are already in production, our state-of-the-art manufacturing facility can fulfill all of your requirements. We make it our goal to help our customers become even more successful by enabling them to get product to market quickly and efficiently.

- Fully support kan-bans, stocking arrangements, etc.
- Support Vendor – Managed inventory programs, consignment, etc.
- Integrate with your web portal for orders, shipping, stocking, etc.
- Package for final distribution
- Small batch or full-volume production

Superior High Precision Medical

CAPABILITIES

Our goal is to offer complete solutions – to be a “One Stop Shop”, if you will. We are constantly investing in both capital and personnel to increase our offerings so that we can serve you better.

Our capabilities include:

- CNC Swiss-style machining
- CNC 5-axis milling
- CNC precision flute-grinding
- CNC laser welding
- ElectroPolish
- Process validations
- CNC bending
- To be determined by your requirements
- CNC mill/turning
- CNC wire EDM
- CNC laser marking
- Citric passivation per ASTM A967
- Cleanroom assembly
- Custom packaging
- Design for manufacturability support

MEDICAL DEVICE EXPERIENCE

MSK has been serving the Medical Device community for more than two decades. We are trusted partners with some of the top names in the industry, earning their respect by providing stellar metrics through operational excellence, competitive pricing, flexible manufacturing systems and excellent Customer Service from start to finish.

A partial list of product-types we produce:

- Titanium implants
- Biodur implants
- Surgical Power Tool Components
- External fixation systems for trauma procedures
- Surgical cutting tools (burs, drill, reamers, etc.)
- Surgical robotic components
- Vision system components
- Coblation wand sub-components
